Topics

- Business expansion in growing fields
 - Nutritious food market
 - Cerebral aneurysm treatment
- Other topics

Nutritious Food is a Prospective Growing Market

A positive sales growth

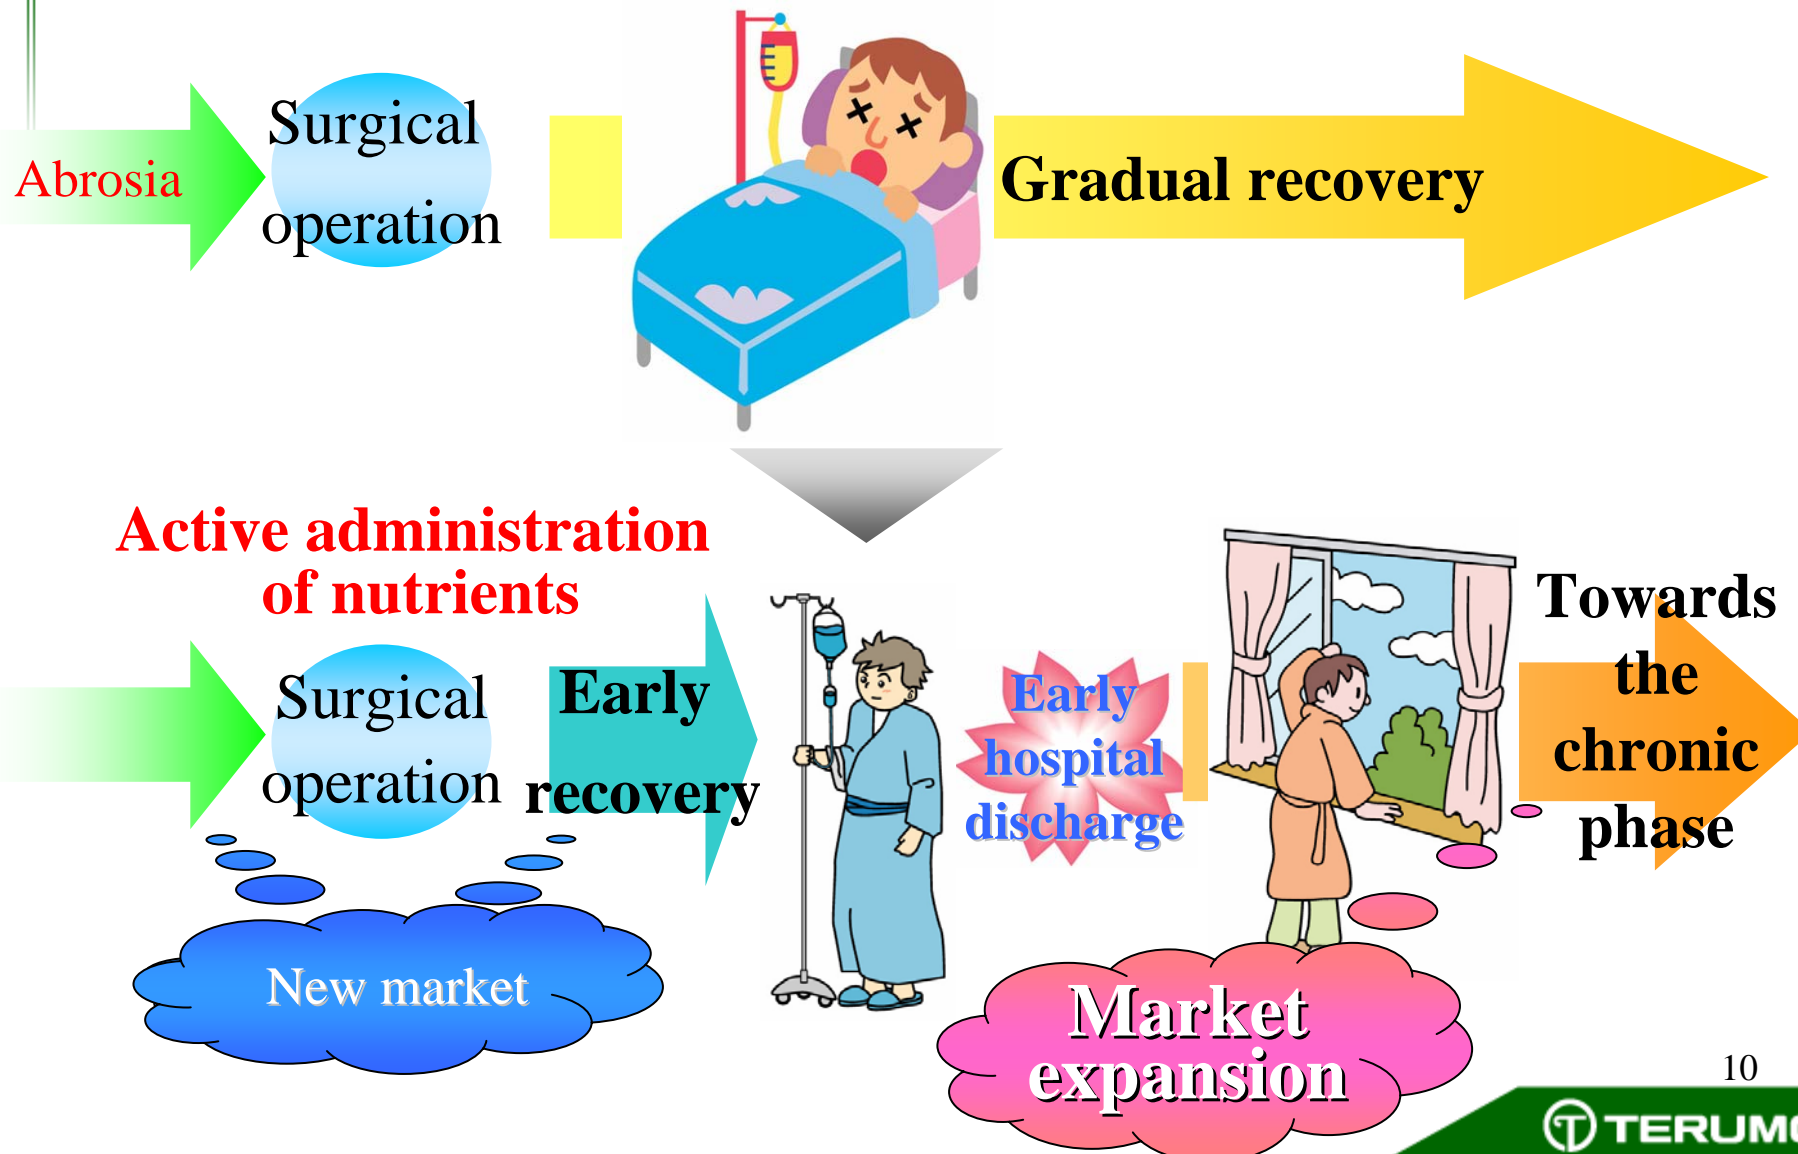

The market will continue to grow and gather attention

Shifting from the pharmaceutical nutrients to nutritious food due to the drug cost reduction

The Paradigm Shift of the Nutritional Management Progresses Towards an Early Recovery and Hospital Discharge

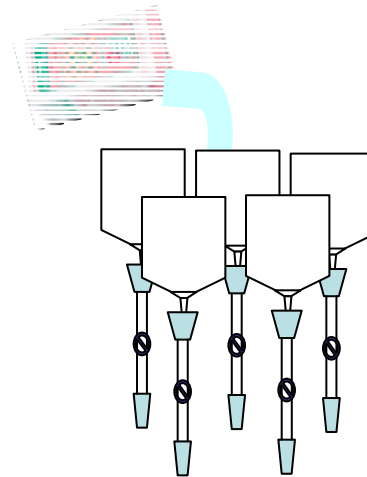

The Medical Practitioners and Patients are Waiting for Better Products

Tube and Bottle feeding

Bags are reused

Preparation is complicated

It can cause the risk of back flow and infection

Oral administration

It doesn't taste good.
Can't drink this much...

Promoting the Product Development in order to Improve the Healthcare Economy

Ready-for-use

Simple & convenient

- Practice improvement
- Infection prevention
- Medical accidents prevention
- Improve the QOL

Jelly type

A thickened type

Prevents the back flow

Small volume with high calorie

Flavored to suit the palate of the elderly people

Granular type

Appetizing, can drink it all

The Coil Treatment of Cerebral Aneurysm Grows

(Unit: Billion yen)

We expanded rapidly after entering the business

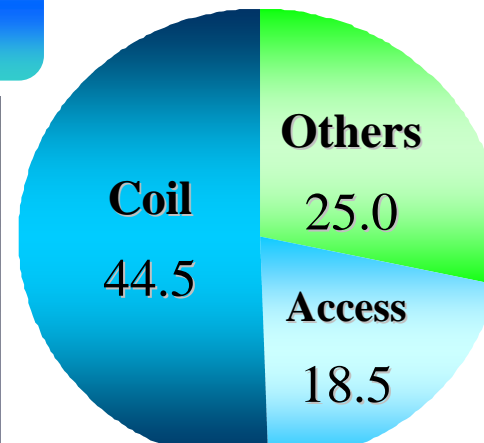

※ Entered the market following the acquisition of MicroVension (U.S.) in 2006

The market is growing

The coil treatment
88,000 cases annually,
Growth rate: 11%

- Stent (Coil-Assist)
- Stent (Flow-diversion)
- Embolic Agent
- Micro catheters
- Micro guidewires
- Guiding catheters etc

Device market
880 (US \$Mil) annually,
Growth rate: 17%

※2008 Results (by Terumo)

Faster Development for Expanding the Business Further

Japan

December 2009
“HydroCoil”

C1 (the additional
charge for the new
function) approved

Launched:

January 8, 2010

Guidewire for
the cerebral vessel
“Traxess”

Launch Planned
for this Q4

Guiding catheter
for the cerebral
vessel

Improving the product range in Japan

Pursuing synergies of MicroVention & Terumo

“Only One Technology”

MicroVention’s coated
coil

“Improved design

for the cerebral blood vessel”
Terumo’s access devices

**Challenge to
develop new devices**

Newly Launched “Oxygen concentrator for home oxygen therapy” with a Safety Mechanism

The first ever launch
in the world

Equipped with the detection system for prevention against fire

Oxygen concentrator for home oxygen therapy
“O₂ Green IBUKI 5SP”

The Production Expansion in Ashitaka & Fujinomiya Factories

New building of Ashitaka factory

January 20, 2010: Completed

A rendering of the new building of
Fujinomiya factory

January 2010: Construction began

Spring 2012 : Ready for operation
