

Basic Approach

While contributing to patients and healthcare professionals through its core business, the Terumo Group also engages in social contribution activities as a good corporate citizen based on its Group mission of "Contributing to Society through Healthcare." We aim to help achieve a sustainable society by gaining a deeper understanding of the society, culture, and environment of each country and region and by pursuing activities that meet the expectations and demands of communities, mainly in our work to support the spread and development of healthcare.

Supporting the Spread and Development of Healthcare

Aid in Response to the Global COVID-19 Pandemic

Terumo has donated a total of more than US\$4 million in support of combating the global COVID-19 pandemic in the various different parts of the world where the Company operates. These donations include products such as thermometers and Extracorporeal Membrane Oxygenation (ECMO), as well as monetary donations made to several organizations, including the COVID-19 Solidarity Response Fund for WHO (SRF).

The SRF was established in March 2020, with the WHO Foundation (which has its headquarters in Geneva, Switzerland) acting as its secretariat. The SRF uses donations received from enterprises and individuals throughout the world to support measures taken by the WHO in response to COVID-19, including research on vaccines and testing equipment, education to prevent the spread of the pandemic, provision of medical supplies, activities to ensure an equitable allocation of vaccines which has become an urgent social issue, as well as treatment, diagnosis, and testing, supply of personal protective equipment, and strengthening of healthcare systems. Terumo has donated a combined total of US\$2 million to the SRF in 2020 and 2021.

Amid the struggles of local medical institutions in Europe in dealing with the COVID-19 pandemic, Terumo Europe NV, a Terumo

Group company, has put in place a system that enables associates to take paid leave in order to participate in volunteering activities, so that associates who are qualified doctors or nurses can volunteer to assist in medical settings. Through this system, associates in various European countries who possess clinical or other medical skills have been able to volunteer at hospitals and senior care facilities, providing useful support for these institutions' activities.

Blood Donation Activities in Countries throughout the World

Terumo Blood and Cell Technologies is a global leader in blood component, therapeutic apheresis and cellular technologies. They believe in the potential of blood to do even more for patients than it does today. This belief inspires innovation and strengthens collaboration with customers—which is why Terumo Blood and Cell Technologies' associates throughout the world continuously facilitate and engage in activities to promote blood donations while aiming to contribute to blood transfusion treatments.

They launched their "From the Heart" program in January 2021, a global blood donation awareness program designed to provide associates with the tools they need to get involved, whether that's donating, volunteering or simply helping spread the word to colleagues, friends and family. The mission of the project is to contribute to a safe, accessible and sustainable blood supply. From the Heart has set an aggressive goal of obtaining 6,000 units of blood from associate donors in fiscal 2021. The program also organizes and sponsors community blood drives, where thousands of units of blood are expected to be collected.

Blood Donation Awareness Program

Terumo Groups Associates have been participating in blood donation and related awareness raising activities

Supporting Early Diagnosis of Children with Congenital Heart Disease in India

Congenital heart disease (CHD) is a neonatal birth defect resulting from the abnormal development of the heart that can affect the interior walls of the heart, the valves inside the heart, or the arteries and veins that carry blood to the heart or the body. It is said that nine out of 1,000 newborns in India have CHD, and it is one of the leading causes of infant mortality in this country. However, roughly 90% of these infants can be treated if their CHD is detected through early examinations.

Terumo Group subsidiary Terumo India Private Ltd. (TIPL), which sells oxygenators and other devices used in cardiac surgeries, partners with Bangalore-based NGO Aishwarya Trust to conduct prescreening camps in order to identify children suffering from CHD and support those diagnosed with the disease in undergoing surgical correction.

In fiscal 2020, the COVID-19 pandemic posed several challenges in conducting the screening camps. The travel restrictions combined with concerns around Associate Safety and availability of resources made the overall process very difficult. Despite these challenges, TIPL was able to support 25 camps that screened 2,584 underprivileged and high-risk children susceptible to CHD and provided surgical treatment and care to 74 children diagnosed with CHD by donating 2.04 million India Rupees to the Aishwarya Trust.

Holding Terumo Medical Seminars for the General Public

To mark the 100th anniversary of the company's founding, in March 2021 Terumo held a Terumo Medical Seminar for the general public. The goal was to disseminate appropriate medical information, including the latest findings, to patients and their family members, and to spread awareness of the importance of disease prevention, early diagnosis, early treatment, and preventing conditions from worsening.

The topic of this year's Terumo Medical Seminar was type 2 diabetes. Dr. Kohjiro Ueki, Director of the Diabetes Research Center, Research Institute, the National Center for Global Health and Medicine, gave a talk on the provision of appropriate treatment that is tailored to individual patients' circumstances and life stage. The seminar was provided in an on-demand format. We intend to continue holding Terumo Medical Seminars on a regular basis, once a year.

As an enterprise involved with healthcare, going forward, we will continue to implement measures that are of value to patients, healthcare professionals and society as a whole, and we will strive to make a contribution toward the realization of a healthier, better future for humanity.

Sponsorship for Nursing Day and Nursing Week Activities

Terumo provided sponsorship for Nursing Day and Nursing Week activities implemented throughout Japan by the Japanese Nursing Association (JNA) and the Ministry of Health, Labour and Welfare (MHLW) from May 9 until May 15, 2021. Terumo has continued to provide sponsorship since these activities were first held in 1991. This marks 31 consecutive years of support.

Nursing Day was instituted in 1990 by what was then the Ministry of Health and Welfare, with the aim of cultivating the spirit of caring, nursing, and helping each other among people of all ages and both genders. Nursing Day is celebrated every year on May 12, which was the birthday of Florence Nightingale, the founder of modern nursing. The period of one week from Sunday to Saturday that includes May 12 is designated as Nursing Week.

Recognizing the need to encourage more people to consider nursing as a career in order to maintain the systems for providing healthcare and nursing care in today's era of declining birthrate and an aging population, starting from 2021 the main focus in the Nursing Day and Nursing Week activities is on spreading awareness of the appeal of nursing among the younger generation. Terumo agrees with the purpose of the Nursing Day and Nursing Week activities, and by supporting these activities, we are able to make a contribution to society through healthcare.

TERUMO LIFE SCIENCE FOUNDATION— Contributing to Improvements in Medicine and in the Health of All People through the Ad- vancement of Life Science Technologies

The TERUMO LIFE SCIENCE FOUNDATION was established through contributions by Terumo Corporation in 1987 with the aim of contributing to improvements in medicine and in the health of all people through the advancement of life science technologies. The foundation focuses its activities on three areas: subsidies for domestic and overseas research and development programs for creating technologies in the field of life science, awards for researchers that have made excellent achievements through subsidized research projects, and educational activities to share the appeal of life science with younger generations.

Targets of subsidies include research and development projects for creating new value in medical settings in Japan and for improving healthcare and public hygiene in developing countries. In addition, subsidies are provided to fund social contribution activities and workshops for enhancing medicine and healthcare levels. In fiscal 2020, subsidies totaling ¥290 million were provided to 128 projects.

Educational activities include the operation of the Life Sciences DOKIDOKI Laboratory website, which is mainly intended for junior high and high school students. The site provides young users—leaders of the future—with the basic knowledge required to understand life sciences as well as information from the front lines of life science fields presented in an easy-to-understand format. This year, new quiz contents were added that will help people to develop an interest in the life sciences while having fun.

The TERUMO LIFE SCIENCE FOUNDATION will continue such initiatives going forward with the aim of contributing to the improvement of medicine and healthcare.

Support for Disaster-Stricken Areas

Guided by its Group mission of “Contributing to Society through Healthcare,” the Terumo Group provides relief to areas impacted by earthquakes, typhoons, and other natural disasters through financial assistance as well as donations of thermometers, blood pressure monitors, and other Terumo products.

In fiscal 2020, we donated emergency relief supplies with a value totaling around ¥10 million through the Japanese Red Cross Society to help areas affected by the Heavy Rain Event of July 2020 that struck Kyushu region. We also presented a monetary donation of ¥1 million to Kumamoto Prefectural Government.

To provide support for the areas affected by the large-scale explosion that occurred in Beirut, Lebanon in August 2020, Terumo Europe NV and Terumo BCT, Inc. donated a combined total of US\$15,000 to the Lebanese Red Cross and to DSC Lebanon, an NGO that organizes blood donation activities in Lebanon. In addition, Terumo Americas Holding, Inc. and other Terumo Group companies based in the US made a combined donation of US\$40,000 to the American Red Cross to help areas affected by the wildfires that occurred in California in October 2020.
