■ Principle 4-11: “Prerequisites for Ensuring Effectiveness of the Board of Directors”

(3) Evaluation of the Overall Effectiveness of the Board of Directors and Summary of Results

[Board evaluation process]

We conducted self-evaluation of board effectiveness in fiscal 2022 in order to further improve board effectiveness. All board members answered anonymous self-assessment surveys, and we conducted interviews with certain members of the Board of Directors and the Secretary of the Board. In order to maintain objectiveness of the board evaluation process, we used a third-party company to collect all survey sheets, and conduct interviews and analysis.

After reviewing the findings of the analysis, the Corporate Governance Committee, of which a majority of members is independent directors, discussed and proposed major opportunities and action plans to the board in order to enhance board effectiveness.

[Fiscal 2021 Board evaluation results and actions]

The main items identified as requiring further consideration in the fiscal 2021 evaluation of board effectiveness and the actions taken in fiscal 2022 for each item are as follows.

Development Area	Actions executed in 2022
Monitoring of GS26, the medium- to long-term Growth Strategy, discussion of Beyond GS26, and ongoing discussions contributing to corporate value enhancement.	We have clarified the framework, methods, and operating structure for monitoring including KPIs, and started monitoring GS26 as One Terumo. In terms of ESG, we established a Sustainability Committee to strengthen our commitments and efforts to sustainability, and established a system to ensure that CSV and ESG are reflected in the performance evaluation and compensation of directors and officers.
Continued monitoring, and ongoing discussions on the further evolution of the global management structure.	Both domestically and internationally, we discussed and reported on potential risk events to the Board of Directors, in a timely manner, and promoted initiatives to further improve the governance level of our overseas subsidiaries. We also had ongoing discussions on the evolution of the global management structure.
Improve understanding of human capital on the business and the execution side, contact with employees at various levels, and site visits.	We promoted understanding of human capital and workplaces by setting up opportunities for explanations and discussions by leaders of major overseas subsidiaries at board meetings, and by conducting online site visits of overseas subsidiaries.
Ongoing review of short-, medium-, and long-term human capital requirements (skill matrix) for the entire board (internal and external).	Discussions have been held on an ongoing basis on the optimal board composition and succession from a short-, medium-, and long-term perspective.

[Fiscal 2022 Board evaluation results (overview)]

The main results of the evaluation showed the following items, confirming the maintenance of the high effectiveness of the Board of Directors and continuous and steady improvements in governance.

- The change and transition of the chairperson of the board in Fiscal 2022 went smoothly, and the board meetings have proceeded in an appropriate manner, encouraging active commentary from each director and positive discussions among the group.
- The nature and culture of the Board of Directors, where directors from diverse backgrounds candidly share their opinions, is a clear strength of the company, and directors respect each other without any boundaries between internal and external directors, creating solid relationships of trust.
- The understanding and consideration of long-term corporate value enhancement as One Terumo has increased, and strategic discussions on mid- to long-term management issues have been enhanced.

[Evaluation results (Development opportunities)]

While the results of the above evaluation were positive, the following issues were mainly identified as requiring further consideration.

- Discussions contributing to long-term enhancement of corporate value: High quality and focused discussions on specific points related to ESG, DX, human capital management and others, shared recognition of expectations from investors and other stakeholders, continued monitoring of GS26,

deepening of discussions on Beyond GS26, reaffirmation of direction especially regarding gender diversity in Japan.

- Risk management with a focus on overseas subsidiaries: Ongoing discussions on timely and accurate identification and response to company-wide risks and further evolution of global management structure.
- Understanding of the actual situation on the execution side and in the field: Creating opportunities to gain an understanding of the next generation of management executives through dialogue with human capital on the business and execution side, and fostering a global business perspective within the Board of Directors by interacting and engaging with employees at various levels of the organization.
- Board composition: Continue to examine board composition to realize global governance.

In Fiscal 2023, we will undertake measures to address these issues, amongst others, which have been recognized as challenges by the Board of Directors and in committee activities. Furthermore, we remain committed to continuously considering and implementing additional measures to ensure and enhance the effectiveness and functionality of the Board of Directors.

■ Supplementary Principle 4-11(1): “Stance on Diversity of Board of Directors”

Terumo considers the diversity of board of directors to have rich experiences and knowledge of directors to make discussions and decisions in the board, based on the management strategies and the external environment required .

(Corporate Governance Guidelines “2. Corporate Governance Structure (9) Selection/dismissal of Directors”)

In addition, the Corporate Governance Committee and other committees have continued to discuss the appropriate size of the Board of Directors, it has been judged that the size of the Board of Directors is appropriate with the current situation.

The knowledge, experience, and abilities that the Board of Directors (internal and independent directors) are supposed to have are confirmed by making a skill matrix in the process of evaluating the effectiveness of the Board of Directors conducted every year. The skill matrix has been published in Terumo Reports since 2021. In 2022, it is disclosed in the Terumo Report ESG section.

- Terumo Report ESG section : <https://www.terumo.com/sustainability/reports>

■ Principle 5-2: “Establishing and Disclosing Business Strategies and Business Plans

From the earliest days of the modernization of Japanese medicine right through to today, we have tackled social issues according to the demands of each era. Today, the environment surrounding healthcare is undergoing major changes, including policies placing increasing downward pressure of healthcare expenditure around the world and growing societal demands to improve patients' quality of life as our societies age. The recent pandemic further has accelerated such changes. In order for us to remain a company required by society, it is essential that we provide patient-centric solutions to the new healthcare challenges arising amidst the constant change of the 21st century, and that we further the evolution of healthcare.

In light of the above, discussion and review shall be based on the following perspectives, and will form the basic policy of the business portfolio review:

The group operates eight businesses across three companies, working to solve problems in medical settings by providing products and services to treat a wide range of diseases. Drawing on the stable business foundation created by our wide range of business areas and the diversity of our technologies, we will tirelessly pursue opportunities to create new businesses in order to achieve market-beating growth while maintaining and improving profitability.

To optimize the structure of our existing businesses, we will be examining the performance of each business unit over the past several years in terms of both growth and earnings, making necessary adjustments with consideration for mid- to long-term measures based on product life-cycle analysis, and taking into account the potential for company-wide synergies and brand creation arising from business diversity as well as social needs.

At the same time, with a view to the creation of new business considering possibilities involving both organic and inorganic growth, we will examine the potential for market expansion from a variety of angles, including disease, region, customer and technology, and assess their strategic suitability from the standpoint of our existing business capabilities and management resources; i.e., the pros and cons of their implementation will be determined on the basis of whether the company's strengths can be leveraged to do so.

Aiming to achieve sustainable and profitable growth, and while maintaining the autonomy of each company and business, in order to meet market expectations for the group as a whole, we will continue to optimize our business portfolio by increasing discipline and control from a corporate perspective.

[Incentives]

Status of incentives provided to directors

Performance-linked system of remuneration introduced; stock option system introduced and others

Supplementary Explanation [Update](#)

[Basic policy and composition]

To provide appropriate motivation to enhance corporate value over the medium- to long-term, the remuneration for executive directors shall be determined focusing on (a) appropriate risk-taking by the management and (b) the same profit awareness as shareholders.

To achieve the objective described in (a) above, we will set an appropriate balance between fixed remuneration and performance-linked remuneration (bonuses). To achieve the objective described in (b) above, restricted stocks have been adopted (Remuneration-type stock options could be granted for overseas residents).

[Performance-linked remuneration (bonuses)]

(1) Purpose, summary of calculation method

Annual bonuses are a form of remuneration aimed at motivating directors to achieve sustainable growth and annual performance; therefore, purpose-aligned evaluation factors are adopted. Evaluation factors consist of Companywide factors and the performance factors for each director's business operations targets set for each director. The annual amounts of bonuses are calculated by multiplying (a) the evaluation index determined based on above evaluation factors by (b) the standard bonus amount set for each position.

(2) Company-wide factors and fluctuation range

At present, revenue, operating profit, ROIC and ROE are adopted as Company-wide factors. Target of Company-wide factors should be a planned target at the beginning of each annual year. When the target is achieved at 100%. For fiscal 2022, evaluation index of revenue and operating profit is divided into the first half and the second half considering factors of geopolitical risks and inflation and so on, while ROIC and ROE are evaluated based on year-end target. To motivate directors for sound business performance improvement, evaluation index fluctuates between 0% to 150% according to their achievement rates.

(3) Performance factor for each director's business operation and fluctuation range

At present, revenue and adjusted operating profit of the department(s) they oversee, and other targets set for each director are adopted as Performance factor for each director's business operation. Sales revenue and adjusted operating profit of department in charge should be a planned target at the beginning of each annual year. When the target is achieved at 100%, evaluation index should be 100% (evaluation index are divided into the first half and the second half for fiscal 2022 due to the same reasons above). To motivate directors for sound business performance improvement, evaluation index fluctuates between 0% to 150% according to their achievement rates. With regard to other targets set for each director, especially for important projects, target plan is set at the beginning of each annual year and evaluation index fluctuates between 0% to 100% based on achievement status at the end of the year (From fiscal 2023, we will start a new evaluation system "Future Corporate Value Targets" that contribute to the improvement of medium- to long-term corporate value, and evaluate within the range of 0% to 120% depending on the achievement status at the end of the year).

(4) Policy and ratio for setting evaluation factors for each director's position

With regard to evaluation factors, ratio of company-wide factor and performance factor for each director's business operation is as below. For Chairman and CEO, only company-wide factor is used as evaluation factor. For director who is responsible for his/her business, ratio of performance factor for each director's business operation is a little high. For director who is responsible for certain function or local area, ratio of company-wide factor is a little higher than director who is responsible for his/her business.

- Chairman and CEO: company-wide factor 100%, performance factor for each director 0%
- Director responsible for the business: company-wide factor 70%, performance factor for each director 30%
- Director responsible for certain function or local area: company-wide factor 71-80%, performance factor for each director 29-20%

Future corporate value targets will be implemented from fiscal 2023 and its achievement will be reflected in bonuses evaluation of all directors and executive officers, including the Chairman and the CEO.

[Restricted Stock]

In order for executive directors to share benefits and risks of stock price movement with shareholders and further enhance their desire to contribute to rises in stock prices and improvement of corporate value, restricted stock has been adopted since FY 2019. Under the concept "sharing awareness on profits with shareholders for a long term", directors may not transfer to a third-party or otherwise dispose of restricted stock allotted to them for thirty years (or until their retirement from position of director if earlier). Furthermore, if directors commit fraud or violate laws during their term as director, all or part of their allotted stock will be acquired by the Company without consideration.

Supplementary Explanation

In order to provide more explicit motivation to increase corporate value over the long-term and give officers a shared awareness of benefits from the same perspective as shareholders, stock options were introduced. Stock options have been granted to executive directors, group executive officers and executive officers who resides outside of Japan.

To executive directors and executive officers who resides in Japan, restricted stock has been adopted since FY 2019 as mentioned above.
