

## **Terumo Interventional Systems Targets Growth With New Focus on U.S. Urology Specialty**

*April 1, 2013, Marks Start of Company's Direct Distribution and Product Support of GLIDEWIRE® Hydrophilic Coated Guidewires*

SOMERSET, N.J., Feb. 19, 2013 /PRNewswire/ -- Terumo Interventional Systems, a business unit of Terumo Medical Corporation, today announced the launch of a new, dedicated group focused on direct sales, marketing, support and distribution of key products to the urological specialty beginning April 1, 2013.

The move is part of the company's commitment to strengthening a direct relationship with urologists nationwide that currently use its market-leading GLIDEWIRE® Hydrophilic Guidewire family of products. GLIDEWIRE® guidewires have captured 94 percent of the Hydrophilic guidewire market and are used in about one-third of all minimally invasive urological procedures in the U.S. GLIDEWIRE® guidewires are valued for consistent performance and fast, reliable access management. This new strategy marks the end of a distribution agreement of GLIDEWIRE® guidewire products to U.S. urology customers between Boston Scientific Corporation and Terumo Interventional Systems.

"Terumo Interventional Systems is extremely excited about taking our urology business direct and we are committed to meeting the growing demands of this important customer base," said James Rushworth, President, Terumo Interventional Systems and Onset Medical Corporation. "Combined with our recent acquisition of Onset Medical, we are poised to offer innovative access systems to the urology specialty and intend to leverage world-class technology with our existing robust distribution, supply, and service capabilities to forge strong physician relationships. Terumo Interventional Systems plans to introduce a steady stream of devices inspired by clinical performance, economic advantages, and improved quality of life for patients."

### **About the Urology Market**

According to market research by Millennium Research Group, Inc., the expanding U.S. urological device market is expected to reach \$2.3 billion by 2016. Each year, approximately 685,000 patients undergo kidney stone management procedures and the number is expected to steadily increase as more patients and physicians opt for minimally invasive treatments.

Terumo Interventional Systems has already begun notifying urology customers of the transition and is providing assistance to ensure uninterrupted product supply, service, and support.
