In Japan, there were strong sales of infusion and syringe pumps in Hospital systems division as well as growth in the B2B business with pharmaceutical companies in Alliance division. Overseas, there were indications of a robust recovery in demand for daily use products in Asia as well as the veterinary market in North America.

Blood and Cell Technologies Company

Global revenue increased 12.0% to ¥58.2 billion. In Japan, mainly sales of blood center products declined slightly. Overseas, there was a recovery in demand for whole blood collection, therapeutic apheresis systems, and cell processing products.

(2) Overview of Consolidated Statement of Financial Position

Total assets stood at \$1,369.0 billion, an increase of \$17.8 billion. This was mainly owing to an increase in property, plant and equipment of \$7.9 billion from investments in manufacturing facility and an increase in goodwill and intangible assets of \$3.0 billion from investments in new IT systems.

Total liabilities came to ¥465.0 billion, a decrease of ¥29.5 billion. This was mainly attributed to a decline in trade and other payables of ¥10.8 billion due to the payments related to facilities and a decrease in bonds and borrowings of ¥9.9 billion due to repayment of corporate bonds.

Total equity was ¥904.0 billion, an increase of ¥47.3 billion. This mainly reflects an increase of ¥50.0 billion from posting profit for the period of and booking of other comprehensive income associated with the impacts of yen weakness in FX that resulted in an ¥8.2 billion increase, compared to a decrease of ¥11.3 billion due to the payment of dividends from retained earnings.

(3) Forecasts, including the Consolidated Financial Results for the Fiscal Year Ending March 31, 2022

At present, we must continue to monitor risks such as uncertainty about subsequent waves of COVID-19 infections and risks posed by a drop in demand, supply chain interruptions, and soaring transportation and raw materials costs, among others. Nevertheless, the Group plans to pour energies into the introduction and expansion of highly value-added products that will boost the quality and efficiency of healthcare, along with further improvement to manufacturing costs, and effective use of selling, general and administrative expenses.
